

COLD FOOD HOLDERS THERMOELECTRIC CHILLERS

Models CC, ECC

CC 86070
Countertop Chiller

ECC 86063
Dairy Chiller

ALSO AVAILABLE
FOR EXPORT

Bid Description

Both the Countertop and Dairy Chiller are designed with thermoelectric technology to cool up to 2 quarts (1.9 L) of condiments, garnishes or dairy (ECC). Both are constructed of brushed stainless steel with a black thermoset plastic rim and clear plastic lid.

The solid-state cooling method provides quiet operation and holds product below 41° Fahrenheit (5° C) indefinitely. The anodized aluminum serving vessel is included. An ON/OFF rocker switch controls the cooling mechanism.

Used in conjunction with an auto-frothing attachment, the Dairy Chiller, ECC accepts a hose directly from an espresso machine into a $\frac{5}{16}$ ths (7.9 mm) hole in the lid.

Standard Features

Thermoelectric operation assures quiet operation and maximum energy efficiency

Removable anodized aluminum serving vessel for easy cleanup

Holds indefinitely below 41°F (5°C) — to keep your product fresh and cold

Durable stainless steel and plastic construction

Clear lid permits monitoring levels without opening

12 foot (3.7 m) power cord

Two quart (1.9 L) capacity

Warranty

Server Products equipment is backed by a two-year limited warranty against defects in materials and workmanship. For a copy of our complete warranty statement, see our web site or contact us.
